Pistol Carbine Policy.

Pistol Carbine has now been approved for use at Auckland Pistol Club.

What is a Pistol Carbine?

A Pistol Carbine consists of a B Category firearm (Pistol) and an approved Pistol Carbine Conversion Kit. Put together, it allows you to shoot your B Category Pistol in a rifle carbine type configuration.

Note: It is NOT a rifle chambered in a pistol calibre.

Why would you shoot a Pistol Carbine?

The reason Auckland Pistol Club is now allowing these Pistol Carbine Conversion Kits to be used is to allow club members that shoot 3Gun to practice their rifle skills for 3 Gun competitions.

Pistol Carbine Conversions can be shot at the club and not breach our current range standing orders because at the centre of the conversion is still a B endorsed Pistol.

Which Pistol Carbines can I shoot at APC?

Only the types of Pistol Carbine conversion kits approved by the committee can be used at the club. **Anyone found shooting a Pistol Carbine Conversion kit not listed as approved will have their club membership revoked and will no longer be a member of Auckland Pistol Club.**

Pictures of approved Pistol Carbine Conversion Kits.

There are three types of Pistol Carbine Conversion Kits which have been approved by Committee for use at Auckland Pistol Club.

If you are not using one of these, then it is not approved for use by the committee.

Severe penalties are in place if you are caught shooting an un-approved PCC.

If you are not sure, ask first!!!

1. The MechTech Carbine Conversion Kit

2. The Hera Arms Triarii Carbine Conversion Kit

3. The CAA Roni Carbine Conversion Kit

4. FAB Glock KPOS Carbine Conversion Kit

5. Dark Force Carbine Conversion Kit

Safety rules for Pistol Carbine at Auckland Pistol Club.

- Pistol Carbine Conversion Kits must be assembled in the safety zone. Then a chamber flag must be inserted and the PCC placed into the provided PCC rack, or alternatively they can be put back into a gun bag covering the PCC.
- If you are bringing your Pistol Carbine Conversion assembled complete-with-pistol to the club, then it is to be treated like any other firearm and checked in the safety zone, before being chamber flagged and placed in the PCC rack or put back into a gun bag.
- When a competitor comes to the line they are required to be ready. They may either choose to retrieve their PCC from the rack or unbag their PCC in the safety zone then come to the line. We do not want to be bagging and un-bagging on the line or at the completion of a course of fire.
- When a competitor brings their PCC from the rack or from the safety zone, the muzzle will remain pointing upwards. The chamber flag is to remain in place until they are given the command to "Load and Make Ready".
- Pistol Carbine Conversions can be moved between ranges and back and forth to the PCC rack so long as the chamber flag is clearly visible and the muzzle is pointing upwards.
- The start position for shooting Pistol Carbine is "Port Arms" with the muzzle low – unless otherwise specified in the stage start description.
- PCCs are not to be staged or placed on the range until the competitor has been given the command "Load and Make Ready"
- At the end of shooting the stage, under the guidance of the Range officer, the competitor will clear the PCC and insert the chamber flag, then either return the PCC to the rack or take back to the safety zone to bag.
- At this time, it is not acceptable for competitors to wear their PCC in a sling while on the range.

Rules.

For simplicity sake the rules for PCC at Auckland Pistol Club will follow the current IPSC handgun rules with the exception of Section 5.2 Holster and other competitor equipment (and rules pertaining to use of a holster) and Section 8.1 Handgun Ready Conditions – where the PCC will either be loaded (with safety mechanism applied) or an unloaded start.

Divisions.

To reduce any confusion the club will recognise two divisions.

Standard Division

Minimum power factor for Major	170
Minimum power factor for Minor	125
Minimum bullet weight	No
Minimum bullet calibre / cartridge case length	9 x 19mm
Minimum bullet calibre for Major	10mm
Maximum ammunition velocity	1500 fps
Minimum trigger pull	No
Maximum size	No
Maximum magazine length	No
Maximum ammunition capacity	No
Optical/electronic sights	No
Compensators, ports, sound and/or flash suppressors	No

Open Division

Minimum power factor for Major	160
Minimum power factor for Minor	125
Minimum bullet weight	120 grain for Major
Minimum bullet calibre / cartridge case length	9 x 19mm
Minimum bullet calibre for Major	10mm
Maximum ammunition velocity	1500 fps
Minimum trigger pull	No
Maximum size	No
Maximum magazine length	No
Maximum ammunition capacity	No
Optical/electronic sights	Yes
Compensators, ports, sound and/or flash suppressors	Yes
